DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see Remarks (page 8, the last paragraph) filed 12/02/2004, with respect to independent claim 1 have been fully considered and are persuasive. The rejection of claims 1-3, 5, and 7-16 has been withdrawn.

2. Claims 1, 5-16, and 22-35 are allowed.

3. The following is an examiner's statement of reasons for allowance:

* Independent claim 1 has been amended to incorporate the allowable features of claim 4 and intervening claims 2 and 3;

* New independent claim 22 has been added and incorporated the allowable features of claim 6 into original claim 1 along with the features of intervening claim 5;

* The present application provides a new method for authenticating objects, which can prevent the counterfeited goods from being sold on the market (see specification, page 1, paragraph 3). Particularly, the new ... comprises the following features, which the prior art taken either singly or in combination does not teach:

- the encoded image is printed with a frequency of a predetermined number of lines per inch wherein an authentication image is revealed when the encoded image of the printed image is viewed through a lenticular lens having a frequency that matches that of the encoded image (see independent claims 1 and 22).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
